

# HEILIND

## HEILIND *CONNECTS* SUPPLY CHAIN SOLUTIONS

### FLEXIBLE SOLUTIONS

Heilind offers flexible solutions tailored to customers' unique applications to enhance the procurement process.

## BUSINESS BENEFITS OF **HEILIND'S SUPPLY CHAIN SOLUTIONS**

Leveraging over 50 years of distribution experience, Heilind provides customized solutions that minimize the risk of disruptions, improves inventory turns, and enhances order accuracy. Customer system integration streamlines orders and receipts, stabilizing transaction quality.

**Heilind Connects** with customers by providing the right mix of supply chain programs to reduce operational overhead, transaction costs, paper waste, and stock-outs.

### **HEILIND'S SUPPLY CHAIN PROGRAMS**

- › eCommerce Platform
- › MRP and Electronic File Sharing
- › Consignment Inventory
- › Inventory Management Replenishment Systems (IMRS)
- › Application Programming Interface (API) Data Sharing

## THE HEILIND ECOMMERCE PLATFORM IS A FULL-SERVICE CUSTOMER PORTAL.

**The eCommerce platform enables customers to view real-time business critical information, place orders, and streamline the procurement processes ensuring efficient supply chain operations.**

The “Quick-Quote” BOM quoting tool is a key platform feature that supports the importing of part files to streamline price sourcing. The tool allows for the access to product prices and availability assisting customers with cost analysis and purchase order creation.

### KEY FEATURES & BENEFITS

- › Enter orders and email Heilind representative directly through the platform.
- › Download engineering drawings/renderings, 3D objects, and datasheets.
- › View reserved inventory and order/part activity reports.
- › Access millions of part numbers through online search.
- › Check order status and view shipment details.

**Get your personalized login and access to your data online in real-time.**

# THE MRP & ELECTRONIC FILE SHARING PROGRAMS SIMPLIFY THE SUPPLY CHAIN.

**MRP and Electronic File Sharing saves time, increases accuracy, and streamlines the procurement process.**

The sharing of supply chain transactions in a computer-to-computer environment saves time, increases accuracy, and improves the overall efficiency of communications. Eliminate non-value-added steps in the procurement process through computer-to-computer exchange — automated EDI, emailed electronic files, or SFTP exchange.

### KEY FEATURES & BENEFITS

- › Heilind's dynamic product pipeline mirrors customers' MRP, reducing stockouts.
- › Improves data accuracy by removing the risk of human error in data entry.
- › Consistent electronic sharing of MRP & purchase order files with Heilind.
- › Delivers key procurement data elements such as inventory status, order confirmation, invoice, and shipping notices.
- › Supports multiple file formats allowing flexibility.

**Choose your parts. We will map your data and begin sharing.**

# THE CONSIGNMENT PROGRAM SUPPORTS INVENTORY IN CUSTOMERS' FACILITIES.

**Onsite consignment inventory grants immediate access to inventory allowing for rapid-start production.**

Leveraging Heilind's Consignment Inventory Management program provides a competitive advantage with reduced inventory carrying costs, increased inventory responsiveness, vendor reduction and enhanced customer service.

### KEY FEATURES & BENEFITS

- › Consignment allows for immediately accessible in-house material stock.
- › Heilind maintains ownership of inventory until transferred to production.
- › Heilind replenishes inventory back to agreed stocking levels.
- › Material invoicing is based upon consumption reporting.
- › Customers have full visibility for more efficient planning.

**Choose your parts and stocking levels. We will set up your program and send a stock package.**

## INVENTORY MANAGEMENT REPLENISHMENT SYSTEM (IMRS)

### THE IMRS PROGRAM OFFERS AN EFFICIENT AND SIMPLE REPLENISHMENT PROCESS.

**IMRS optimizes inventory levels by restocking product as needed to minimize excess.**

This dynamic solution reduces carrying costs, improving supply chain efficiency by transmitting inventory needs directly from customers' production floors to Heilind's warehouse, enhancing overall inventory management while avoiding stock excess or shortage conditions.

#### KEY FEATURES & BENEFITS

- › Program supports customer-specific bonded inventory and same-day shipments.
- › Utilize Heilind-supplied scanning hardware or use of the eCommerce platform.
- › IMRS works with consignment, Kanban, JIT, and direct-order-entry (DOE).
- › Inventory is kitted in customer-directed optimal package sizes.
- › Offers a demand-driven purchase order release program.

**Choose your parts and pack sizes. We will assist with hardware and eCommerce needs for your efficient ordering.**

# THE API SOLUTION AUTOMATES THE PROCUREMENT PROCESS.

**APIs streamline sourcing, ordering, and management of materials by providing real-time data exchanges between customers and the Heilind platform.**

Heilind's flexible and adaptable API service enables customers to connect, share, and receive data improving the accuracy and efficiency of the supply chain. The API service is easy to implement and uses simple, adaptable programming.

### KEY FEATURES & BENEFITS

- › APIs improve the visibility of Heilind data within customer environments.
- › Provides real-time access to part pricing, data, and availability.
- › The API service scales and adapts to changing business needs.

**Schedule a consultation with a Programs Specialist to identify your API needs and set up data exchange.**

## ADDITIONAL HEILIND SUPPLY CHAIN TOOLS

- › **Bonded Inventory** / Inventory reserved under virtual lock for Customers.
- › **Custom Bar Code Labeling** / Package and shipping labels designed to Customer specifications.
- › **Consolidated Shipping** / Combined shipments to reduce costs.
- › **Consolidated Invoices** / Combined invoices to reduce individual invoice communications.
- › **Advanced Shipping Notice (ASN)** / Automatic tracking information to customers' inboxes.

Contact your Heilind sales representative to coordinate a consultation with our **Supply Chain Program Specialists** to determine a solution tailored to your company's needs.
