

Rivets, blind rivet nuts and installation equipment

Revolutionary and world famous – the POP® range includes high-quality blind rivets and rivet nuts for non-structural applications.

Avdel® offers the widest range of blind fasteners and tooling in the market. In fact, those products are so pervasive that just about every manufactured product has, at some time, been assembled, fastened or touched by Avdel® technology.

POP® and Avdel® portfolio includes:

- Blind Fasteners,
- Speed Fasteners,
- Lockbolts,
- Threaded Inserts,
- Assembly systems,
- Self-Piercing Rivets,
- Tools.

Masterfix® Products is one of Europe's main blind riveting technique professional brands under the STANLEY Engineered Fastening umbrella.

Masterfix® portfolio includes:

- Rivets,
- Rivet Nuts & Bolts,
- Hand Tools,
- Power Tools.

Molded wire protection products and plastic fasteners

a PennEngineering® Company

Heyco® Products offers decades of experience in the design and manufacture of molded wire protection products and stamped electrical components to meet demanding customer application requirements. Heyco® unique, in-house ability to offer customers the latest design and prototyping technology along with years of high volume manufacturing experience is our way of turning challenging "just-in-time" manufacturing deadlines into production realities.

Heyco® portfolio includes:

- Solar Power Components,
- Liquid Tight Flexbile Conduit, Tubing and Fittings,
- Liquid Tight Cordgruips,
- Strain Relief Bushings,
- Venting Solutions,
- Bushings, Grommets, HeyCaps and Plugs,
- Heyware,
- Power Components,
- IEC Locking Power Cords.

Sealing solutions

Since 1947, APM Hexseal Corp. has been the leader in developing and manufacturing sealing solutions that significantly prolong the life of switches and circuit breakers in hostile environments. AP, Hexseal Corp. offers a wide variety of silicone switch covers and sealing hardware, including a complete line of reusable, self-sealing fasteners and sealing washers.

FASTENER GUIDE

HEILIND

Performance. Trust. Innovation.

Founded in 1974, Heilind Electronics has become one of the world's leading specialist distributors for connectors, electromechanical components and fasteners. Today, it has more than 40 subsidiaries all around the world.

The company expanded to Europe in 2015, opening European headquarters in Germany with locations in Feldkirchen-Westerham, Holzkirchen and Rosenheim. In 2019 Heilind has expanded further still and in to the Eastern European market, establishing branch office in Krakow, Poland.

Heilind's line card includes a wide product range from the world's leading manufacturers and can therefore offer its valued customers the best solutions. A large inventory of stocked items means the fastest delivery is guaranteed. In addition, Heilind offers exclusive extra value and services:

- Certified product on lines for connectors according to current ABS, EN, MIL and VG standards,
- Assembly of switches (also with customer-specific modifications),
- Delivery of small quantities,
- Project support – from the idea to the sampling to the series,
- Identification products and services of any kind (including printer and associated maintenance),
- Purchasing service for components outside the line card,
- Kiting and other work preparatory steps,
- Customized logistics concepts – from buffer stock to consignment inventory and VMI concepts,
- Support through international service network.

Connectors and electromechanical components

Day after day, the industrial sector needs to demonstrate its innovative strength in the face of rapid progress and the wide range of demands made on it. Together with our manufacturers, we are able to find effective, customized solutions in all sorts of industries, such as the lighting, power, mechanical, automation, robotic, medical and communications sectors. Heilind is the ideal partner for you when it comes to connectors, switches, relays, sensors, product identifications and cables. The depth and breadth of our product range means that we are able to find the right product to meet every need.

Self-clinching fasteners*

PEM® brand fasteners utilize self-clinching, broaching, flaring, surface mount, or weld technology to provide strong, reusable, and permanent threads and mounting points in thin sheet metal, P.C. board materials, and other ductile or non-ductile thin material. PEM® portfolio includes:

- Nuts For Sheet Metal,
- Cable Tie-Mounts And Hooks For Sheet Metal,
- Studs and Pins For Sheet Metal,
- Elements For Mounting Into Printed Circuit Boards,
- Standoffs For Sheet Metal,
- microPEM® Fasteners,
- Captive Panel Screws And Hardware,
- Sheet-To-Sheet Attachment,
- VariMount® Bonding Fasteners.

PEM® installation equipment**

Haeger, a PennEngineering® Company, manufactures hardware insertion machines, and is the world leader in the development of innovative fastener insertion technology solutions. Haeger has introduced its full line of machines which provide our SingleTouch Part Handling Technology. These machines allow the insertion of up to four different fasteners in a single handling of a part. The Technology offers the single most significant boost to hardware insertion productivity since the introduction of automatic tooling systems. Haeger machines Create Hardware Insertion Profit Centers™ by optimizing labor, improving quality, and increasing productivity through the use of technology.
