

# Trident T2P and T3P Contacts

## Versatility, performance and reliability

Ultra reliable, fully proven and delivering outstanding performance - the Trident contact system is fully interchangeable and utilized throughout the Trident connector series, and is an ideal choice for alternative connector series requiring an outstanding contact system.

Both the two-piece stamped and formed T2P contacts and the three-piece machined T3P contacts feature three retention latches and an optimized body shape which provides excellent contact alignment and ultra-secure mating.

Available in wire size AWG 14 to 26 (0.08 - 2.5 mm<sup>2</sup>) in brass and high conductivity copper alloy, with tin, gold, and flash-gold plating options there is a Trident contact for all requirements.

Simple and fast to work with, Trident contacts are supported by a full range of tooling including hand extraction and crimp tools and automatic applicators and pneumatic crimp tools.

### The ITT CANNON Difference:

- Global capabilities and local support
- Proven application expertise
- Over a century of interconnect leadership
- A committed innovator and business partner

### Features:

- Contacts fully interchangeable between Trident connector series
- Available as two-piece stamped and formed (T2P) and the three-piece machined (T3P) contacts
- Durability up to 500 mating cycles
- Brass and high conductivity copper alloy variants, with tin, gold and flash-gold plating
- Available in wire size AWG 14 to 26 (0.08 - 2.5mm<sup>2</sup>)
- Full range of support tooling available

Precise contact alignment and secure mating due to three retention latches and an optimized body shape

Simple, quick and secure hand insertion of contacts

Smooth and easy contact removal with extraction tool

### Tooling Options include:

Hand tool for stamped contacts

Hand tool for machined contacts

Extraction tool

Mini applicator for stamped contacts

Pneumatic crimp tool for machined contacts

## Why ITT

ITT is a focused multi-industrial company that designs and manufactures highly engineered critical components and customized technology solutions. ITT's Cannon brand is a leading global manufacturer of connector products serving international customers in aerospace, defense, medical, industrial and transportation end markets. ITT's Connector business, which also includes the Veam and BIW Connector Systems brand, manufactures and supplies a variety of connectors and interconnects that make it possible to transfer data, signal and power in an increasingly connected world.
